Demonstration Phase

December 15, 2023

Contents

1.   Introduction

The purpose of this document is to present a cross-platform application designed to showcase the AI model to the stakeholder. This application, which utilizes machine learning for sales prediction, consists of a full-stack solution with the front-end developed using HTML/CSS/JavaScript and the back-end implemented in Python with the Eel framework

Demonstration date: 13.12.2023

2.   Demonstration

2.1.   Location

The demonstration was conducted in an online meeting due to the geographical location of client

2.2.   Description

The session began with an introduction where I introduced the application designed for predicting sales of protective gear equipment in the Polish market, outlining its key features.
